Introduction

Welcome to the Merative Social Program Management 8.0.2.0 iFix10 release.

This is a cumulative release that incorporates all improvements, resolved issues, and third-party updates in previous 8.0.2.0 iFix releases. For full details, see the release notes for each of the previous iFix releases online at [Release Notes](#).

For product documentation, see [Merative Support Docs](#).

System Requirements

For information about the supported software for this release, see the [Social Program Management Prerequisites](#).

[Back to top](#)

Download

Download instructions for this release can be found at [Social Program Management support](#).

[Back to top](#)

Security Bulletins

Security Bulletins are now available from the [Merative Software Downloads](#), under Knowledge Documents. You must be a technical contact to access this site, see [Social Program Management support](#) for details.

[Back to top](#)

Installation

For full installation instructions, see the Development Environment Installation Guide at [Product Documentation and PDFs](#).

The basic installation steps are as follows:

- Review the release notes and documentation for any prerequisite steps.
- Download and extract the contents of the .zip file to a local drive location.
- Ensure that all files in your Social Program Management installation are writable.
- Run the Social Program Management installer, which you can find in the INSTALLER folder.
- Run the appropriate build targets for your installation.

Upgrading

If you are upgrading from a previous version, the Cúram Upgrade Helper contains documentation and tools to help you to upgrade your Cúram application codebase and database. The Cúram Upgrade Guide describes the recommended process for application and database upgrades. The Upgrade Helper contains tools to assist you with implementing the upgrade, including tools to produce a schedule of required migrations for your upgrade, tools to provide information about database schema changes, and tools to generate initial SQL scripts for applying changes to your database. Download instructions for the latest version of the Cúram Upgrade Helper are available from [Social Program Management support](#).

Accessibility

DT036660, WorkItem:SPM-127359 - The Tab key temporarily loses focus on the New Evidence modal

Issue Description:

When adding new evidence with a keyboard, if a user presses Tab when on the Category dropdown clear action, the focus is temporarily lost for one keystroke and then moves correctly to the Type column header.

User Interface Impact: No

Steps to Reproduce:

1. Log in as Caseworker.
2. Register a Person and create an integrated case.
3. On the integrated case, open the Evidence Tab and select New Evidence from the page-level menu.
4. The New Evidence modal opens with the focus on the Category dropdown.
5. Press the Tab key to move the focus to the clear action.
6. Issue: Pressing Tab when on the Category clear action moves the focus to an invisible element rather than to the Type column header.

Resolution:

When navigating with the Tab key on the New Evidence modal, the focus moves correctly to the Type column header.

[Widgets](#)

Widgets

DT036658, WorkItem:SPM-127357 - Initial focus is incorrect on modals with paginated lists

Issue Description:

When a user opens a modal with a paginated list, the initial focus goes to the pagination control rather than to the start of the list. A screen reader user is not informed of the content of the page. For example, the Locations popup modal on the New User modal.

User Interface Impact: No

Steps to Reproduce:

1. Log in as administrator
2. On the Administration Workspace expand the Shortcuts panel.
3. Under User, select New User.
4. On the New User modal, select the Location search icon.
5. The Locations modal is displayed.
6. Issue: The initial focus is on the pagination control at the end of the modal. The content of the modal is skipped.

Resolution:

The initial focus now goes to the start of the list as expected.

DT036638, WorkItem:SPM-127358 - No visible indication that the columns on a list page can be sorted

Issue Description:

There is no visible indication to a user that the columns on a list page can be sorted by selecting column headers.

User Interface Impact: No

Steps to Reproduce:

1. Log in as Administrator.
2. On the Administration workspace tab expand the Shortcuts panel.
3. Under Organization select My Organization.
4. Select the Structures tab and under Organization Structures select a organization.
5. A new tab will open displaying the selected organization, select the Positions tab to view the table that shows positions within the organization.
6. Issue: There is no indication to the user that the table data can be sorted by clicking a column header.

Resolution:

A visible indicator has been added to table headers that indicates content that can be sorted by selecting a column header.

WorkItem:SPM-127430 - The clear selected value (X) is not shown in the date and time picker

Issue Description:

The clear button is not displayed on the time dropdown of the date and time picker after the user selects a value.

User Interface Impact:Yes

Steps to Reproduce:

1. Log in as caseworker.
2. Go to the Inbox tab.
3. Open the tab actions menu and click New Task to open the New Task dialog.
4. Navigate to the Time dropdown under Deadline and select a time value. For example, 10:30.
5. Issue: The clear button is not displayed next to the selected time.

Resolution:

After entering a time, the clear selected value button (X) is displayed on the date and time picker.

Curam Modules

[Intelligent Evidence Gathering](#)

Intelligent Evidence Gathering

WorkItem:SPM-127315 - Multiple list for the same entity but with different criteria aren't supported on single page.

Issue Description:

When different criteria are controlling the display of items within list questions on a single page of an IEG script, the first defined criteria are being used for all the list questions on the page. As a result, some items are displaying incorrectly.

User Interface Impact: No

Steps to Reproduce:

1. Use an IEG script with a page that contains multiple list questions with different display criteria for each list question.
2. Launch the IEG script and complete the script to the page that contains the list questions.
3. Issue: The items that match the first-defined criteria are displayed for all list questions.

Resolution:

Now, when different criteria are controlling the display of items within list questions on a single page of an IEG script the correct items are displayed based on the defined criteria.
