

Why are two versions of the Cúram Upgrade Helper available for download on the Merative Support Community?

Question & Answer

Question

Why are two versions of the Cúram Upgrade Helper available for download on the [Merative Support Community](#)?

Answer

Because of changes in the Social Program Management Java™ Development Environment (JDE), the “IBMCuramUpgradeHelper_Latest” Cúram Upgrade Helper on the Merative Support Community is no longer compatible with upgrades to Social Program Management 8.0.1.0 and earlier versions. Therefore, a second version of the Cúram Upgrade Helper is available on the Merative Support Community that you can use for upgrades to Social Program Management 8.0.1.0 and earlier.

- Use the IBMCuramUpgradeHelper_Latest Cúram Upgrade Helper only to upgrade to **Social Program Management 8.0.1.1 and later versions.**
- Use the IBMCuramUpgradeHelper_8010_Releases_And_Earlier Cúram Upgrade Helper only to upgrade to **Social Program Management 8.0.1.0 and earlier versions.**
