Installation

For full installation instructions, see the Development Environment Installation Guide at [Product Documentation and PDFs.](#)

The basic installation steps are as follows:

- Review the release notes and documentation for any prerequisite steps.
- Download and extract the contents of the .zip file to a local drive location.
- Ensure that all files in your Cúram installation are writable.
- Run the Cúram installer, which you can find in the INSTALLER folder.
- Run the appropriate build targets for your installation.

Upgrading

If you are upgrading from a previous version, the Cúram Upgrade Helper contains documentation and tools to help you to upgrade your Cúram application codebase and database. The Cúram Upgrade Guide describes the recommended process for application and database upgrades. The Upgrade Helper contains tools to assist you with implementing the upgrade, including tools to produce a schedule of required migrations for your upgrade, tools to provide information about database schema changes, and tools to generate initial SQL scripts for applying changes to your database. Download the appropriate version of the Cúram Upgrade Helper from Merative Support. You must log in to download software, request access if needed. Select Cúram Support and Software Download, enter your credentials and download the software.

Improvements, Resolved Issues and Third Party Updates

Curam Enterprise Framework

Curam Enterprise Framework

Application Development Environment
Intelligent Evidence Gathering

Application Development Environment

DT036803, WorkItem:SPM-130372 - A performance issues is present on large lists that contain action controls and menus

Issue Description:
When a list has to be rendered with a large number of records containing action controls and menus the resultant page is slow to appear.

User Interface Impact: Yes

Steps to Reproduce:

1. Log in as superuser.
2. Register a person.
3. Add 4000 notes for that person.
4. Log back in as superuser.
5. Search for the person you registered.
6. Click on the Client Contact tab.
7. Issue: The page is slow to load.

Resolution:
The page and list performance has been improved.

Technical:

The rendering of the layout of menu items within a list action menu has been redesigned so that pages or modals containing such lists, load with a better response time.

WorkItem:SPM-130898 - When a modal is opened from within a sublist within a nested list and saved or dismissed, an incorrect view of the source page is rendered

Issue Description:
When a modal is opened from within a sublist within a nested list and the modal is saved or dismissed, the source page is refreshed with an incorrect view rendered, only the sublist data is displayed.

User Interface Impact: Yes

Steps to Reproduce:

Scenario 1:

1. Log in as a system administrator.
2. Select the System Configurations tab.
3. Expand the Application Data section and select Code Tables.
4. Search for Gender.
5. Expand the Gender list.
6. Select Edit on the 'Female' sublist item, enter in a sort order of 1 and click on save.
7. Issue: The screen is being refreshed and the screen is rendering with only the gender sublist data visible on the Code Tables tab.

Scenario 2:

1. Log in as a Supervisor
2. Register a new person and create a Social Assistance case.
3. Navigate to the evidence tab and create an Employment Status record for the person.
4. Navigate to the In Edit evidence list page.
5. Expand the Employment Status record to view the sub list details.
6. Select Continue Editing.
7. The Edit Employment Status Evidence modal is displayed, enter a comment and select save.
8. Issue: The evidence tab is being refreshed, the tab is rendering with only the Employment Status Change History visible.

Resolution:
The page is refreshing and rendering correctly, the focus is on the sublist within the nested list and the user can see the updated values.

Intelligent Evidence Gathering

DT036335, WorkItem:SPM-131315 - Using an IEG script an intermittent error is displayed during the intake stage when screening a person for benefits

Issue Description:
An intermittent error is displayed during the intake stage of screening a person for benefits using the Intelligence Evidence Gathering script.

User Interface Impact: No

Steps to Reproduce:

1. Launch the IEG script and complete the script to apply for medical benefits.
2. Complete the About You and Household Information pages, and click Next.
3. Issue: A NullPointerException is displayed on the screen during the information-gathering process.

Resolution:
The SecureSantize class has been updated which has resolved the NullPointerException error occurring during the intake portion of the Intelligent Evidence Gathering script.

Known Issues

Please refer to the [Known Issues documented for 8.1.0.0](#).
